Professional Summary

Software Engineering student and full-stack developer who builds and deploys web applications with React, Next.js, Node.js, Express and MongoDB. Built an Amazon clone with Stripe payments and Firebase authentication, along with Netflix and Apple website clones, and is now developing a School Management System. Strong eye for clean, responsive UI. Seeking an internship opportunity in a collaborative team.

Projects

School Management System
2026 – Present

Full-Stack Developer (in progress)

MongoDB · Express · React · Node.js

- Building a platform to manage students, teachers and courses.
- Implementing secure authentication and role-based access.

Full-Stack Amazon Clone

Full-Stack Developer

React · Node.js · Express.js · Stripe API · Firebase · Tailwind CSS

- Integrated Stripe PaymentIntents for secure checkout handling.
- Configured Firebase authentication and persistent Firestore order storage.
- Structured clean backend routes and controllers for orders and user sessions.
- Code: github.com/BEWKET-MENGIE/amazone_clone

Netflix Clone

Frontend Developer

- Built a responsive, Netflix-style streaming interface from reusable components.
- Focused on mobile-first layouts and usability.

Apple Website Clone

Frontend Developer

- Recreated the Apple website with a clean, pixel-focused responsive layout.
- Focused on mobile-first design and performance.

Education

B.Sc. in Software Engineering
2016 – 2020 E.C.

Injibara University
